ABOUT US

"First impression is the last impression." Inspired by this principal rule of the interior design industry, Endeavour started its state-of-the-art facility for the manufacturing of Decorative High-Pressure Laminates. Decorative Laminate are used to customize and beautify the surface of plywood and other base materials so as to suite aesthetics and interior of any given space.

We have also incorporated a 7-point Quality control system to ensure that every single sheet one of our laminate goes through seven different quality control checkpoints during its production period. Our consistent and strategic quality control system, all the way from raw material input level to finished goods level has accredited us with ISI 2048:1995 certification. Our modern and E-governed management protocol has accredited us with the prestigious ISO 9001:2008 certification. Our ability to minimize harmful effects on the environment and to achieve continual improvement of our environment performance has enable us to get certified with ISO 14001:2004. Moreover, Laminates produced in our facility also meet the British European Standard BSEN 438 and American NEMALD 3 standard.
